

# NutraSul plus

## 5% Iron & 5% Zinc

### Keg River Micronutrient Sulfur Fertilizer

Keg River's NutraSul plus 5% Iron & 5% Zinc is made by combining AGRAZINC 80 high quality zinc oxide and magnetite with Elemental Sulfur and Bentonite, and forming into uniform sized pastilles. This product has many advantages over the typical micronutrient products made today. The lower analysis, will allow for many particles to be evenly dispersed throughout the blend. The product is very safe to handle because of the reduced dust, and harder pastille. Keg River micronutrient fertilizers can provide a cost effective source of both Sulfur, Iron and Zinc, that is low in heavy metals. This product is batch weighed and made into a viscous slurry that is cooled into uniform shaped pastilles. A sample of each batch is recorded and kept for a period of not less than 3 months.

#### Product Profile

##### Guaranteed Analysis

<b>Sulfur (Actual)</b>	<b>76%</b>
<b>Iron</b>	<b>5%</b>
<b>Zinc</b>	<b>5%</b>

##### Typical Properties

Color	Dark green to charcoal	Bulk Density	81 lbs per ft <sup>3</sup> or 1290 kgs per m <sup>3</sup>
Particle Size	Size Guide Number (SGN) 250	Breakage Characteristics	Less than 0.20% is - 42 mesh at truck loading.

##### Metals Analysis

Arsenic	None Detected - ICPM	Molybdenum	6 ppm - ICPM
Cadmium	None Detected - ICPM	Nickel	21 ppm - ICPA
Cobalt	4 ppm - ICPA	Selenium	None Detected - ICPM
Lead	136 ppm - ICPA	Mercury	None Detected - CVAA

##### Packaging Options

Shipped in bulk via truck or rail cars, or in Mini-bulk totes 2500 lb (1134 kg).
